**SOURCE DESCRIPTION:**

On September 17, 2004, the Division for Air Quality received an application from Kentucky Utilities Company, Green River Generating Station requesting to continue to operate an electric power generation plant in Central City, Kentucky. This application was determined to be complete on November 16, 2004. The permitted points are Emission Unit 03 (EP02): Coal-fired Boiler #4, Emission Unit 04 (EP03): Coal-fired Boiler #5, and Emission Unit 05 (EP04, EP05, EP06 and EP07): Coal-Handling Operations.

**PUBLIC AND AFFECTED STATE REVIEW:**

The affected states (Indiana and Tennessee) were notified of the issuance of the draft permit on June 20, 2006 via e-mail. On July 5, 2006, the public notice on availability of the draft permit and supporting material for comments by persons affected by the plant was published in *The Central City Leader* in Central City, Kentucky. The public comment period expired 30 days from the date of publication. No states are affected by this permit action.

*Comments received*

Comments were received from Kentucky Utilities Company on August 7, 2006. Minor changes were made to the permit as a result of the comments received, however the Division has concluded that the proposed operation will comply with all air quality regulations and requirements. Therefore, the Division has made a final determination to issue a proposed permit. The proposed permit will become final upon approval of the EPA.
